

Public Notice
Klamath Dam Removal Project
Lakeview Road Closure Extension

When: December 31, 2024 – April 15, 2025

What: As authorized by the License Surrender Order issued by the Federal Energy Regulatory Commission (FERC) in November 2022, the Klamath River Renewal Corporation performed necessary construction work related to the drawdown of the J.C. Boyle, Copco, and Iron Gate reservoirs in January 2024 and removal of the four Lower Klamath Project hydroelectric dams later that year. Beginning on December 15, 2023, a 1.1-mile section of Lakeview Road was temporarily closed for public safety due to an active construction zone. This closure is being extended until April 15th as the area remains an active construction zone while work on the Iron Gate disposal site is being completed.

Where: Lakeview Road is temporarily closed between the Iron Gate Fish Hatchery and 1.1 miles east of Iron Gate Fish Hatchery.

Questions: Please direct all questions, comments, and concerns to Ren Brownell, the Klamath River Renewal Corporation's Public Information Officer, at: ren@klamathrenewal.org and/or 530-670-0016.
